SEEDS

for the

NURSERYMAN

AND

FORESTER

FALL - - 1949

F. W. SCHUMACHER

HORTICULTURIST

P. O. BOX 131

JAMAICA PLAIN 30, MASS.

TERMS

Deliveries are subject to yield of crops and safe arrival of consignments.

It is not possible to have all items listed available at all times. A number of perishable seeds cannot be stored successfully and must be ordered in season. All seeds are offered subject to crop failures or short supplies.

Seeds are sold without warranty, expressed or implied as to description and productiveness. *Goods* should be carefully inspected upon arrival and claims for conditions made at once. We cannot consider claims after seeds have been stored or planted.

All shipments travel at buyer's risk and claims for damages in transit must be taken up with carriers.

NOMENCLATURE—The old method is being retained until the trade as a body accepts the new nomenclature as of second edition of "Standardized Plant Names," available at \$10.50 postpaid. It is a noble book and should be owned by every up-to-date gardener.

CAUTION—While it is true that plants grown from seed of horticultural varieties often yield superior plant material in comparison to that grown from nondescript seed, we wish to emphasize that seeds of such varieties or hybrids, with few exceptions, cannot be expected to come true to name. They are offered here for the convenience of competent plantmen, for research and breeding work only.

PRICES—subject to change without notice, are f.o.b. Boston.

PAYMENT—A cash discount of 3% is allowed on all orders amounting to \$5.00 and more. Please include packing and postage charges with your remittance.

ORDERING—We request that written orders should be a separate part of any correspondence and should clearly show amount and price for each item listed. Quantities smaller than listed cannot be supplied.

ABBREVIATION—N. E. stands for New England seed, a sign of hardiness; d.b. for dried berries; asterisk (*) denotes new or insufficiently known plants of merit.

WE ARE IN THE MARKET FOR TREE AND SHRUB SEEDS OF ALL KINDS.

F. W. SCHUMACHER

<i>sabiniana</i>35	.50	1.50
<i>strobis</i>70	2.00	6.00
<i>sylvestris</i> , for diversity of requirements a choice of strains is offered:			
Continental origins:			
Straight Timber strain, from the sandy plains of northern Europe...	.85	2.50	7.50
Seed from selected forests, water shed of Baltic Sea, Southern Scandinavia, a timber strain.....	.95	2.65	8.00
Seed from Western Europe, green strain for ornamental use and Christmas trees.....	.55	1.60	4.75
Insular origins:			
Seed from controlled forests in East Anglia, England.....	.85	2.50	7.50
Seed from native Scotch Highland stands, Scotland, short-needed, straight stemmed, close to <i>rigensis</i> variety.....	1.60	4.65	14.00
Notable for trueness of type by insular isolation, green winter color of needles and timber production the island strains recommend themselves for ornamental as well as forestry use.
